# POINTS ABOUT NEW YORK

NEW YORK—THE HUB CITY OF THE WORLD

A CITY OF 7,000,000 POPULATION

WITHIN THE CIVIC ZONE

**N**EW YORK CITY is the world's wonder city with a myriad of attractions. As a modern city of interest New York is without a rival in the new or old world. In addition to the city itself there are many attractive nearby cities.

New York is the largest city in the world. It has 7,000,000 residents; within fifty miles distance are 10,000,000 or one-tenth the population of the United States. More people live in New York City than the combined population of the six New England States.

New York City leads all others in grandeur and architectural beauty of its municipal, governmental, and commercial buildings. Its Hotels are the most luxurious in America, and not excelled even by the greatest in Europe. Its Theatres are the best and its Churches are the most sublimely grand. Its Museums contain priceless art treasures.

Financially, New York is surpassed only by London, to which it is a close second. It has more magnificent shops than can be found elsewhere on the globe. Its wholesale houses are the greatest in any country. It has hundreds of notable office buildings, chief among which are the Flatiron, Singer, Equitable, Metropolitan, and Woolworth, the last mentioned being the loftiest inhabited structure in the world, 780 feet high.

## TRANSPORTATION

Its two great railroad terminals, subways, bridges, river-tunnels, afford direct connection with practically every great transportation line by which you can reach 80% of all cities without changing your sleeping car.

### INDUSTRIAL NEW YORK

New York is by far the most important manufacturing city in America, the value of its annual output being more than \$2,500,000,000, or one-tenth of the product of the United States. It has twenty-one separate industries, the yearly output of each of which is more than \$20,000,000; it has over 35,000 separate factories employing over 1,000,000 operatives.

The port of New York is the greatest in the world and handles the most valuable tonnage. By reason of its wonderful transportation facilities by rail and water, New York is accessible to all raw materials. In addition to local trade, it offers unsurpassed nation-wide and foreign markets. Great financial resources and varied labor supply attract the manufacturer.

About 50 per cent. of the export and import business of the entire United States is carried on through this port and financed by New York City Banking Institutions.

Every great industrial Corporation has a purchasing branch or agent in New York. Every Railroad and Steamship System of the United States have New York offices. A host of buyers flood New York City throughout the entire year, purchasing largely, and spreading the news of what New York Markets offer.

### NEW YORK NOW FIRST AS CONVENTION CITY

The Convention Bureau of the Merchants Association is organized for the purpose of assisting organizations holding their conventions in New York City. Its services are at your command.

### EDUCATIONAL ADVANTAGES

New York has two universities and ten colleges; these twelve institutions have over 2,000 instructors.

The universities and colleges have property and investments valued at over \$60,000,000 and a yearly income of \$6,470,066. About 50,000 Students and 1,000,500 Public School Pupils.

### AREA AND WATER-FRONT

It has the largest area of any city in the United States, covering 327 square miles, of which the land area is 209,218 acres. It has a water-frontage on rivers and ocean of 771 miles.
